HEATING, COOLING AND REFRIGERATION: CRUCIAL TO ACHIEVING EUROPE'S ENERGY AND CLIMATE GOALS

Reducing Europe's energy consumption and dependency on imports remains Europe's greatest challenge. Europe's 2020 targets call for a 20 percent energy savings target, which has been updated to 27 percent for 2030.

Heating, cooling, and refrigeration play a fundamental role in this domain. Not only because heating and cooling are associated with many different legislative measures, but most importantly because they've been identified and projected over the long-term as the EU's biggest energy sector. Better efficiency in heating and cooling – specifically in buildings – will therefore contribute enormously to achieving Europe's ambitious overall goals.

EU decision-makers have recognized this enormous potential and so have published a new Heating and Cooling Strategy. This year's ASERCOM + EPEE Symposium will build on the framework of this new strategy, and will shed light on the latest energy-efficiency initiatives in the HVACR sector, the impact of the new F-Gas rules, and the ever-important element of market surveillance.

CHILLVENTA CONGRESS TICKET: EUR 199

"ASERCOM + EPEE SYMPOSIUM"-TICKET: EUR 150

The ticket includes participation in the ASERCOM + EPEE Symposium (or Chillventa CONGRESS), lunch and a get-together in the evening, and your admission to Chillventa 2016.

All prices include VAT at the statutory rate.

PROGRAMME

Exhibition Centre Nuremberg, NCC Ost, Room: St. Petersburg
10.10.2016, 13:00 – 17:00

Topic	Speaker
13:00 – 13:30 Introductions	
Keynote introduction	Claude Blanc, Andrea Voigt
Recognizing the role of the HVACR sector: The EU Commission's heating and cooling strategy	Eva Hoos, TBC
13:30 – 14:45 F-Gas rules and refrigerants: market developments	
Meeting the ambitions of the F-Gas Regulation: The EPEE Gapometer	Ray Gluckman
Proliferation of Refrigerants delays market adaptation	Régis Leportier
Working towards a new lower environmental impact	Steve Yurek
New training needs in the EU	Marco Buoni
14:45 – 15:15 Coffee Break	
15:15 – 16:15 Energy efficiency: solutions to save energy	
Ecodesign for smart appliances	Torben Funder
Frequency inverters to save energy	John Gibson
Energy savings, security, Internet of Things	Christian Ellwein
16:15 – 16:30 Market surveillance: enforcement is key for success	
Legislation without market surveillance is a dead end	Wolfgang Zaremski
16:30 – 17:00 What's next: A vision for the future	
HVAC&R: a vision for the future	Andrea Voigt
Closing remarks	Claude Blanc, Andrea Voigt
